| Designation | Technical Superintendent | Department | Ship Management - Technical |
| Reporting to | GM - Technical | Location | U.A.E / India |

Job Objective:

Our goal is to attain best commercial and financial performance of the fleet, maintaining the vessel at top quality for day to day operations/running.

Technical Superintendent is assigned the vessel, is accountable for best performance within the approved budget and is also required to curtail retention rate of crew.

Job Description:

- Liaise with Master and Chief Engineers for troubleshooting on all technical issues related to shipboard machineries and engines.
- Visit ships for vessel inspections under PMS (Planned Maintenance System) for troubleshooting and maintenance of equipment, machineries and engines onboard vessels.
- Evaluating vessel requisition, selecting most cost effective vendor and ensuring supply in a timely manner to the vessel.
- Follow up on all vessel defects and arrange repair.
- Monitor vessel's Class status and arrangement of surveys and ensuring timely completion to keep vessel under class at all times and minimize deficiencies from other third Parties.
- Coordinate with other technical staff, technical/ maintenance team to plan, organize and conduct vessel repairs and ship visits.
- Coordinate with local suppliers for repairs, services of spare parts and stores related to M/E & Machinery items.
- Co-work with technical experts, engineers and vendor technical team to resolve all matters w.r.t. engines/ deck machineries across all fleet vessels.
- Prepare and submit reports of troubleshooting, defect closure updates, vessel inspections and overall PMS.
- Attend vessels during repairs/Dry-docking.
- Vessel's Budget preparation and operating the vessel within approved budget. Keep close budgetary control on all vessel's technical expenditure and finding the most cost effective solution.
- Interaction with clients and preparing the vessel as per the client requirement.
- Prepare and coordinate Maintenance plan for all machineries.
- Recommend suggestions to seniors to optimize performance of engines/ machineries of vessels.
- Ensure vessel is meeting various flag, class and port state requirements.
- Closing of any observations as raised by Class/ Flag/ Port state/ Clients and QHSE department
- To be involved in problem solving when incidents or breakdowns occur, providing solutions in terms of technical and coordination along with support functions.
- Evaluate operating conditions of the engine and equipment and decides corrective actions.
- Authorizes vessel orders for engine stores, spares, lubrications, repairs and class surveys within limits of authority to ensure vessel remains seaworthy.
- Be available to interview crew, conduct their briefings and ensure Engineers on vessels are suitably qualified and operate in compliance to procedures and planned maintenance activities.
- Lead the purchase and shore repair team to perform well on your assigned vessels
- Any other job deemed suitable by Senior Management to prevent vessel downtime.

Desired Profile:

- Marine/ Mechanical/Electrical Engineer with minimum 6 to 8 years of experience in repair and services of machineries and engines at Merchant Marine vessels.
- Full knowledge of all machineries related operations and maintenance in engine room of offshore vessels.
- Prior expertise in solving technical issues across engine manufacturers such as Yanmar, Cummins, Caterpillar, Detroit and Volvo among other engine manufacturers for merchant ships.
- Open to traveling on board for technical troubleshooting and maintenance as part of the maintenance team.
